### **Special Presentations and Other CKVS News**

#### **Broadcast Glitches**

You may have noticed our signal going down, a weird repeating loop, two songs played at once, and maybe a few other things. We fairly recently upgraded the studio A computer to Windows 11, bought a new mixing board, and the software program that runs our automation program did an upgrade. All these things seem to have come together to create a 'perfect storm' of issues that all need to be tracked down.

Our tech is doing his best to try to figure out what's going on and it's been very frustrating. He thought he solved a few of the issues, but on Friday the computer decided to mute all sound going to our mixing board just before Bushy started his show. We don't know why.

The nickname we gave the system some years back (HAL) remains accurate. We ask for your patience while we work through all the bugs.

#### **Vinho do Porto**

Susana is back from her winter hiatus, so expect new programs starting this Tuesday!
